If the user wants their items delivered door to door, they can select delivery.

The user has the option of self-pickup at Julio's Supermart physical stores.

The address can be searched, and the pin location is used to determine the delivery area.

The user can add more items before checking out.

The order breakdown and payment amount are displayed.

The user can select a payment method such as bank transfer, cash on delivery, credit/debit card, or e-Wallet.

CART PAGE

DELIVERY PAGE

Shows the real-time location of the delivery rider.

Estimated time of arrival of the order is reflected.

Driver information is displayed for easy identification when the order has been received.

It is entirely up to the user to give a tip. The user can tip online or in person.

This enables users and delivery riders to communicate quickly in order to confirm orders and deliver them.

For confirmation, the user should swipe the order received button.

CRM INTERFACE
LOG – IN PAGE

This page allows staff and administrators to log in and gain access to the CRM system. To increase security, each employee has a unique username based on which branch they work in. The staff can choose the branch to which they belong using the drop-down menu.

DASHBOARD

This page displays the various tiles for easier navigation. The staff has limited access and can only monitor the orders, order history, and inventory tile. The admin has complete control over the CRM, including sales, employees, and chat support.

ORDER HISTORY
The order history page displays previous orders and transactions made in the app. It is sortable by day, week, month, and year.

INVENTORY
This page displays the number of stocks available for each item as well as the items that need to be restocked. This also gives the staff the ability to edit, add, and remove listings from the app.

ORDERS PAGE

There are two sections on this page: delivery orders and self-pickup orders. Staff will be directed to the pending orders that must be prepared by selecting the pending tile. The preparing order page displays the orders that are currently being packed and prepared. The delivering tile directs staff to current orders being delivered by delivery riders, along with the rider's current location and order details. The ready for pick-up tile directs staff to the pick-up page, which displays user information, order details, and the date and time of pick-up.
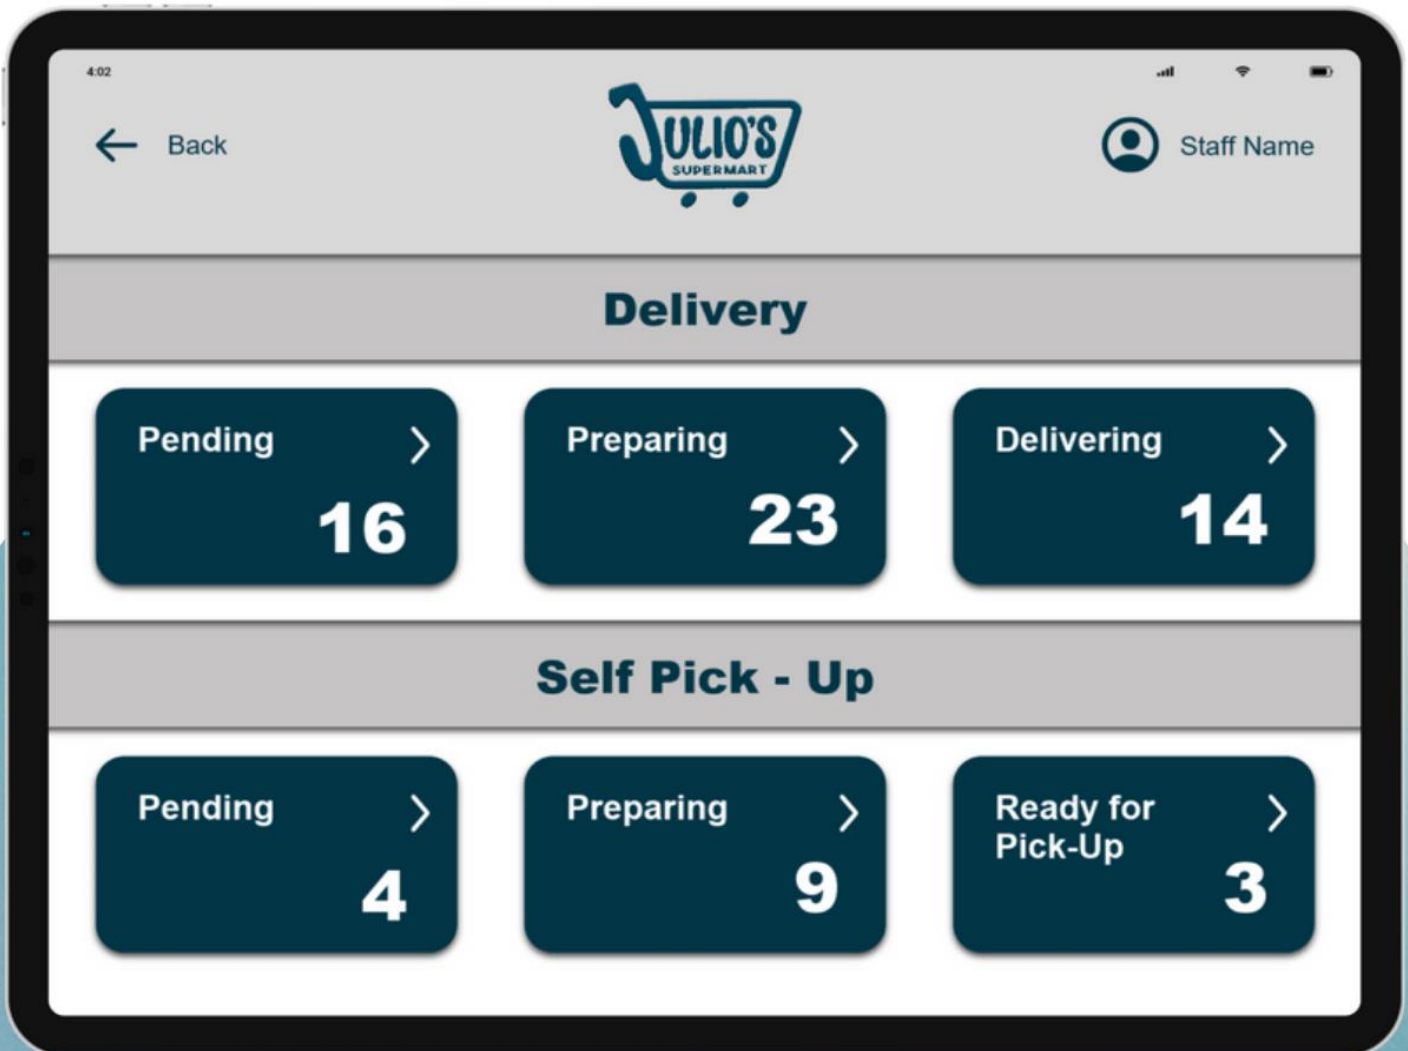

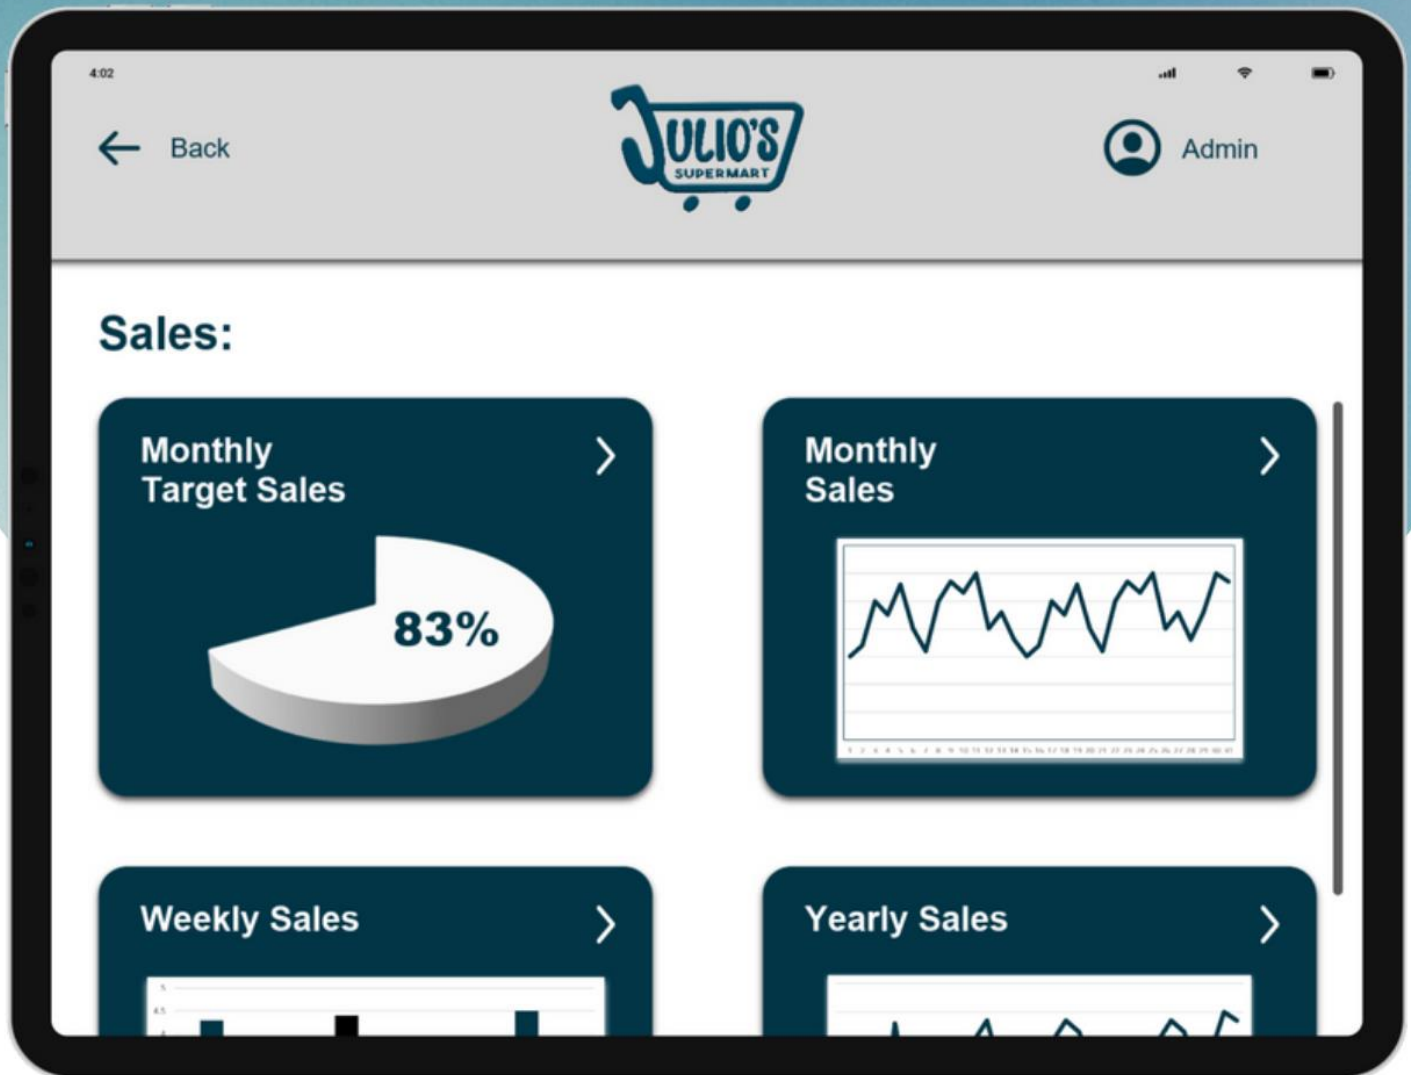

This page displays the app's monthly target sales progress. By clicking the tiles, the admin can also see the detailed monthly, weekly, and yearly sales. This can only be accessed by the admin.

SALES PAGE
Admin CRM

EMPLOYEE PAGE
Admin CRM

This page allows the administrator to keep track of his employees. The online and present staffs can be viewed by clicking the active now tile. The absent tile will display the employees who are absent as well as the dates they are absent. The total employed tile will display all of the employees' information.
